Education

● **Higher studies**
LFC girls higher secondary school
2021-2023
Ranipet-632404

● **Bachelor of Computer Application**
Madras university
2023-2026
Chennai

Skills

Python
Java
C&C++
Data Structure
Html

Experience

● **Antillo consulting office.**   2024-2025

Inward Entry

Through my experience in inward entry, I have developed skills in data entry, inventory management, and communication. I have learned the importance of timeliness and accuracy, as even a small mistake can lead to delays or financial losses. Additionally, working in this role has helped me improve my ability to multitask and work under pressure.

● **Artificial intelligence**   2023-2024

Team work

This is where AI-powered hydration tracking comes in. By analyzing data from smart devices, wearables, and health apps, AI can predict the optimal amount of water a person needs each day. It does this by considering real-time factors like body temperature, physical activity, heart rate, and even humidity levels. Some AI-driven apps can even remind users to drink water at the right time to prevent dehydration.
